

## Specification Quick Glanz C

Quick Glanz C is a polishing agent for hard-coated dragees.  
The product is produced from Carnauba wax Prime Yellow T1 by spray drying without additives.

### Physical / chemical properties:

|                       |                     |
|-----------------------|---------------------|
| Appearance:           | fine powder         |
| Colour:               | light yellow        |
| Melting range:        | 82 – 86 °C          |
| Acid value:           | 2 – 7 mg KOH / g    |
| Saponification value: | 78 – 95 mg KOH / g  |
| Ester value:          | 71 – 88 mg KOH / g  |
| Sulphated ash:        | max. 0,25 g / 100 g |
| Heavy metals:         |                     |
| Arsenic:              | max. 3 mg / kg      |
| Lead:                 | max. 2 mg / kg      |
| Mercury:              | max. 1 mg / kg      |

### Microbiological data:

|                    |                    |
|--------------------|--------------------|
| Total plate count: | max. 1.000 CFU / g |
|--------------------|--------------------|

### Packing:

Multiple paper bag with inner plastic bag of 25 kg net each  
Plastic bag of 25 kg net each

### Storage:

Store dry, in tightly closed packing units, protected against light,  
not at temperatures above 40 °C.

### Minimum durability:

5 years after date of production, respecting the mentioned storage conditions

### Quick Glanz C – Legal status:

Quick Glanz C corresponds to the requirements of Regulation (EU) 231/2012 ff.

### Recommendation of declaration:

Glazing agent: E 903
